

ARway Mapping Best Practices

① Device

Best for **tracking** and **mapping**

Latest **iPhone Pro** for optimal tracking

100% charge before mapping

Min. background apps to maximize memory and network

② Area Planning

Place QR codes either **horizontally** or **vertically**, ensuring they are oriented at either **90 or 180 degrees** from the ground with no tilt

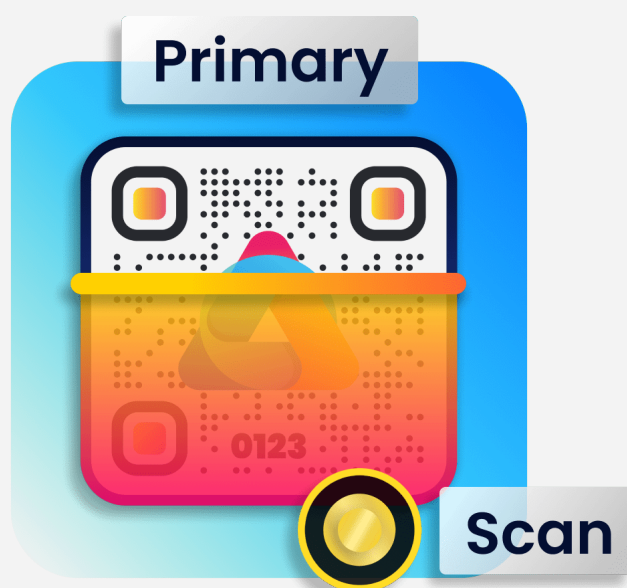

QR codes should be visible from at least **2-3 sides**

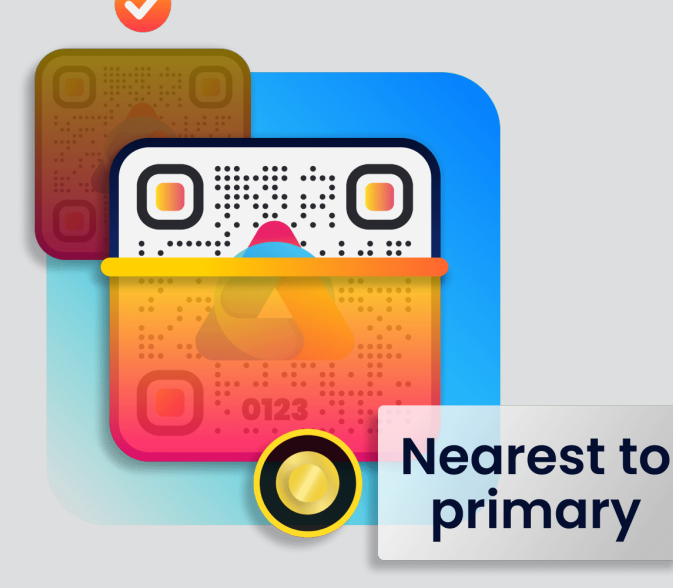

Place **QR code** every **20-30 meters** to avoid drift

③ QR Activation Process

Scan the **primary** QR code

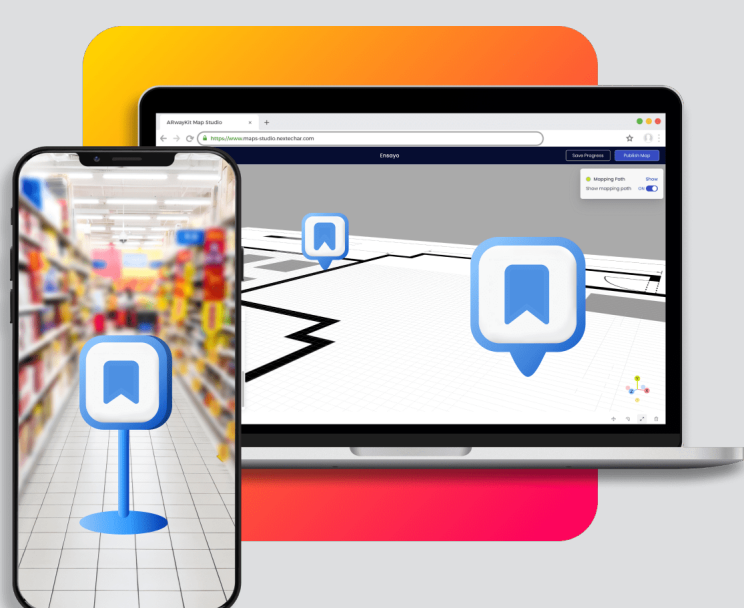

Then, scan the **2nd nearest** QR code

Smoothly move your device while placing content or connecting QR codes

④ Map Creation

Place **map markers** via app and use them as reference for scaling your floorplan in Studio

Save your map **one content piece at a time** to avoid latency
